140G-J

Series G

140U-K

140G-K

Rockwell has launched a new line of Molded Case Circuit Breakers (MCCB) effective January 1st, 2014..

It is physically and electrically different than Rockwell's previous product, which has been in the market for over 40 years used in both their Motor Control Centers and OEM applications.

Eaton has drop-in replacements that is the same form, fit and function as the breakers previously offered by Rockwell, which means customers WILL NOT HAVE TO CHANGE anything by converting to an Eaton product.

The attached documents provides additional details. If you have any aftermarket or OEM conversion opportunities, please work directly with your local KJ Electric OEM Sales Engineer. We are fully equipped to support any opportunity you may have to convert this business to Eaton

OEM Contacts: Mike Eblacker (585-233-0956) • Joe Stirpe (607-760-9923)

Inside Technical Contact: Mike Spry (315-454-5535)
